

Speech Language and Development workshop From Birth-5 years

Presented to you by:

Our objective for this workshop is to help parents learn the difference between normal language development vs. speech delays and impairments.

Through this workshop parents will:

- Decide if your child requires speech therapy
- Learn current speech treatment methods
- Understand the challenges you may face by delaying treatment
- Learn what city funded and health insurance options are available to parents
- Learn to promote your child's language development using everyday activities, routines and play
- Learn to adjust the way you talk to help children develop more advanced language skills
- *Parents will be provided with developmental checklists*
- *Parents will be given plenty of time to engage in a Question and Answer segment.*

Where:

Klub4Kidz
159 North 4th Street Brooklyn, NY
