BIO

"Designs for Architectural Territories" stands for a program of action – where Architectural Design is a method to raise and potentially solve societal deficiencies. DAT Pangea works in Socially-focused Sustainable Architectural Designs. Pangea's style works to develop Projects that aim for a dialog between Architecture and Politics, taking key Social problems into consideration while offering appropriate Design solutions to address specific issues at hand. DAT Pangea was established in 2012 while drinking a beer in Fogg Bar in Madrid. It is proudly formed by Hani Jaber Ávila, Héctor Muñoz Mendoza, Ignacio Taus Jimenez and Ricardo Mayor Luque.
