VISION
The University of New Mexico Health Sciences Center will work with community partners to help New Mexico make more progress in health and health equity than any other state.

MISSION
Our mission is to provide an opportunity for all New Mexicans to obtain an excellent education in the health sciences. We will advance research in the most important areas of human health with a focus on the priority needs of our communities. We will ensure that all people in our majority-minority state have access to the highest-quality health care.

CORE VALUES
The UNM Health Sciences Center’s most important value is a steadfast duty to improve the health of all New Mexicans. We will serve our patients and the public with integrity, accountability and the highest level of professionalism. We will strive as an institution and as individuals to recognize, cultivate and promote all forms of diversity; to fully understand the health needs of our communities and to advance clinical, academic and research excellence. We are committed to performing our duties with compassion and respect for our patients, learners and colleagues.

</table>
At the UNM Health Sciences Center we have long measured our success by improvements in the health and well-being of all New Mexicans. That is our commitment as a public institution and the state’s only academic health center.

This is an ambitious goal. We educate many of our state’s doctors, nurses, pharmacists and other health care providers. We conduct groundbreaking basic and clinical research to treat and cure disease. And we provide care for hundreds of thousands of patients through our clinical arm, the UNM Health System.

The Health System coordinates the patient care provided through the UNM Hospitals, UNM Sandoval Regional Medical Center and our freestanding clinics with the resources of the UNM Medical Group and the UNM Health insurance plan.

Our Health System includes New Mexico’s only Level I trauma center, the neuro-trauma team, cutting-edge cancer care and comprehensive pediatric services. We’re helping primary care providers around the state take advantage of UNM’s expertise via Project ECHO.

We have created a patient care environment that is attuned to the rapid changes brought about by health reform. The old fee-for-service model is rapidly giving way to a value-based care system that focuses on patient satisfaction and quality outcomes.

Changing reimbursement formulae are also driving significant changes in the structure of delivery systems, creating the need for health care entities to forge new, synergistic partnerships with greater flexibility and depth of resources.

With that in mind, we want to share our clinical expertise and patient care capabilities with New Mexico’s hospitals, group practices and other providers because it helps us make progress toward our goal of advancing health care throughout the state.

We look forward to engaging with you.
Like many U.S. academic health centers, the UNM Health Sciences Center is working hard to develop the best possible clinical delivery system to realize our mission and vision.

We are doing this in an era of dynamic change in American health care. Prevailing assumptions about how to provide and pay for patient care are being upended, while a new focus on efficiency, patient experience and improving quality are reshaping health care from top to bottom.

We are responding to these challenges with creativity and commitment as we work to collaborate with community members and providers from throughout New Mexico to better meet our patients’ needs.

The Health System’s strategic plan is focused on community engagement, working to improve patient experience, promoting a culture of excellence throughout the enterprise, greater operational integration and cultivating key partnerships to give patients better access to care and services.

One of our top priorities is to provide the safest and highest-quality care through continuous attention to and improvement of patient outcomes. To achieve this, we are developing the full continuum of care and expanded population health capabilities.

And, we remain committed to building community clinics throughout the Albuquerque metropolitan area so that we can bring health care closer to the people who need it most.

These measures will play an important role in enabling the UNM Health Sciences Center to fulfill its obligation to provide quality health care to the people it serves.

This directory is intended to serve as an introduction to the many services and resources available through the UNM Health System. We look forward to working with you.
The UNM Health System is our state’s largest, most comprehensive health care provider, dedicated to serving the health needs all New Mexicans. It’s a highly complex organization with thousands of skilled employees working in hospitals, clinics and in support functions.

Our physicians, nurses and other providers offer compassionate care for complex conditions that isn’t available anywhere else in New Mexico. Our adult and pediatric psychiatric hospitals provide in-patient and community-based behavioral health treatment, coordinating their efforts with other health systems and governmental entities.

UNM Hospital provides lifesaving care in New Mexico’s only Level I trauma center. Our professionals also offer excellent women’s and children’s care, state-of-the-art stroke care and neurological surgery. The hospital operates under a lease with Bernalillo County and is supported with the proceeds of an annual mill levy.

We have many community-based clinics located throughout the Albuquerque metro area, with more planned in coming years. It’s an important part of making health care more accessible and easy to navigate.

Operating an entity of this size requires prudent management of resources, which is becoming more complicated at a time when the payer landscape is changing. The advent of health care reform and new reimbursement models for Medicaid and managed care organizations are overturning many traditional assumptions about health care financing.

The good news is that we have been operating in this environment for many years. Our management team has been looking over the horizon to see what changes lie in store tomorrow – and the day after tomorrow.

Other providers who partner with our organization gain access to our managerial expertise as well as our superb health care resources. It’s all part of our ethic of service to the people of New Mexico.
The UNM Health System is the clinical arm of the UNM Health Sciences Center, New Mexico’s only academic health center.

Our hospitals and clinics provide care for more than 200,000 New Mexicans each year while serving as training sites for students of medicine, nursing, pharmacy and other health professions and playing an important role in UNM’s community-based health research.

We are home to the state’s only Level I trauma center, its only National Cancer Institute-designated comprehensive cancer center, a comprehensive stroke and neuro-trauma service, a comprehensive burn center, a pediatric cardiothoracic surgery program, advanced women’s care, adult and children’s psychiatric services, bariatric and orthopedic experts and dozens of other specialty lines that we are uniquely equipped to deliver.

The Health System comprises UNM Hospitals, UNM Sandoval Regional Medical Center, UNM Medical Group and community-based and school-based clinics throughout the Albuquerque metropolitan area and across the state.

Collectively, the hospitals handle 22,000 surgical cases, 100,000 emergency room visits and saw more than 900,000 outpatient visits per year.
Care provided through the UNM Health System is primarily funded through Medicaid, Medicare and commercial insurance. The UNM Hospitals also receive the proceeds of an annual mill levy approved by Bernalillo County voters.

The UNM Health System provides an extensive suite of health care services, ranging from primary care and prevention to highly complex tertiary and quaternary procedures. UNM’s outstanding Signature Clinical Programs include:

**Trauma Care**
Provided at UNM Hospital in New Mexico’s only Level I trauma center.

**Medical and Surgical Oncology**
Cutting-edge comprehensive adult and pediatric cancer care provided through UNM Hospital and UNM Comprehensive Cancer Center.

**Women’s and Children’s Care**
Based in the Barbara & Bill Richardson Pavilion at UNM Hospital and at Carrie Tingley Hospital.

**Neurosciences and Stroke Care**
Statewide telemedicine network links patients to UNM Hospital’s fellowship-trained neurosurgeons, neurologists and interventional radiologists, enabling timely state-of-the-art treatment.

**Pain Management**
Patients seen by the multi-disciplinary faculty at the nationally certified UNM Pain Consultation and Treatment Center.

**Total Joint Replacement**
Full range of joint replacement surgeries are performed at UNM Hospital and UNM Sandoval Regional Medical Center.

**Bariatric Surgery**
The latest in bariatric surgical procedures are available at UNM Hospital and UNM Sandoval Regional Medical Center.
The University of New Mexico Hospitals are the centerpiece of the state’s largest academic health complex. The hospital system, including UNM Hospital, UNM Carrie Tingley Hospital, UNM Children’s Hospital, UNM Children’s Psychiatric Center, UNM Psychiatric Center, the UNM Comprehensive Cancer Center and offsite clinics, combines the missions of education, research, patient care and community outreach to provide New Mexicans with the highest level of health care.

UNM is home to the state’s only Level I trauma center, advanced neurosurgical and neurological services, most sophisticated care for children and premature infants and the very latest in personalized cancer treatment. The UNM Hospitals are teaching facilities for the UNM School of Medicine, UNM College of Nursing and the UNM College of Pharmacy, as well as the hub for community-based clinical research programs.

Program Highlights

Nurse Residency Program – Closes the gap between nursing school and clinical practice at the bedside through mentorship, hands-on experience and ongoing education.

Office of Diversity, Equity & Inclusion – Ensures that every UNMH patient receives the safest, most effective and sensitive medical care possible, regardless of race, ethnicity, or any other group identity.

Lifeguard Air Emergency Services – State’s first hospital-based air emergency transport service. Crews are capable of providing quality critical care in all phases of transport to all age groups and populations.

Organizational and Professional Development – UNMH works with employees to strengthen our commitment to our patients and their families through onsite training in communication skills, diversity and cultural sensitivity, language skills and computer skills. Other programs promote clinical excellence, shared governance, department-led change, mentoring, clinical advancement and certification, and leadership training.
We serve Sandoval County’s diverse population in a modern, 72-bed teaching hospital, which includes two medical/surgical units and an intensive care unit. It also houses a state-of-the-art radiology and women’s imaging department, a full-service emergency department, six operating rooms and two procedure rooms, as well as physical and occupational therapy, primary care and specialty care outpatient clinics.

The UNM Health System operates 100 clinics providing more than 950,000 annual visits and procedures each year. Our goal is to do what’s best for our patient at all times and in the right place. UNM Clinics deliver primary care through a system of Patient-Centered Medical Homes and specialty care via a system of comprehensive outpatient clinic sites, both on campus as well as throughout Albuquerque and the state. As an integrated part of the UNM Health System, we strive to provide the best patient experience across the continuum of care.

The UNM Medical Group, Inc. is a not-for-profit 501(c)(3) corporation that comprises more than 1,000 clinical practitioners representing more than 150 specialties who practice at the state’s only academic medical center.

We are the Faculty Practice Plan supporting the UNM School of Medicine. Our team’s primary core functions include responsibility for professional billing, coding and collections and managing outpatient clinics. Additionally, on behalf of the UNM Health System, we manage payor contracting and relations and facilitate strategic planning and business development, including accountable care and population health. We ensure quality and compliance through governance and regulatory reporting, and we maintain the Medical Group’s operational infrastructure to support this core work, including human resources, finance and information technology. As a multi-specialty group practice, the Medical Group operates 11 clinics in addition to attending at UNM Health System hospitals and clinics.

We conduct basic, clinical and translational research to improve the health of New Mexicans and health care worldwide. This research – from bench to bedside to community – has seen continual funding growth, with a record $165 million in grants awarded in FY 2016. It creates substantial economic impact in our state, both through wages and businesses spun off from UNM research.

Our signature programs are supported by the Clinical & Translational Science Center, which is funded through a Clinical and Translational Science Award from the National Institutes of Health. Significant work in cancer genomics is conducted at the UNM Comprehensive Cancer Center, which received “comprehensive” designation from the National Cancer Institute in 2015. UNM is one of just 29 U.S. institutions with both a CTSA and an NCI-designated comprehensive cancer center.

**Signature Programs**

- **Brain & Behavioral Illness** – Delivering delivers state-of-the-art treatment and research into brain diseases and traumatic brain injury.

- **Cancer** – UNM Comprehensive Cancer Center faculty are making important contributions to cancer treatment, diagnosis and prevention.

- **Cardiovascular and Metabolic Disease** – An interdisciplinary team conducts basic, clinical and translational research, as well as population-based outcomes research and community outreach activities.

- **Child Health Research** – Helps faculty members secure grants, funds pilot projects and increases the use of evidence-based practices in child health programs.

- **Environmental Health Sciences** – Sponsors research into community health needs while addressing global environmental health issues.

- **Infectious Disease & Immunity** – Supports the study of infectious and immunologically mediated diseases.
The UNM Clinical & Translational Science Center was launched in 2010 with the receipt of a prestigious Clinical and Translational Science Award from the National Institutes of Health. The award was renewed in 2015 for a second five-year term.

The CTSC works to streamline science, transform training environments and improve the conduct, quality and dissemination of research from laboratories to clinical practice, and out into communities. Our team of more than 300 investigators and support professionals promotes research partnerships and develops new tools, technologies and best practices while providing investigators with opportunities for pilot funding and career development.

The College of Pharmacy is dedicated to improving the health of citizens in New Mexico through innovation in practice, advocacy, community outreach and preparing the next generation of pharmacists.

Clinical faculty in the Department of Pharmacy Practice and Administrative Sciences provide services in a variety of settings. They improve the health of patients and of our communities by optimizing drug therapy, improving adherence to medications, enhancing medication safety, providing health education, administering vaccinations, providing health screenings and serving as vital members of interprofessional health care teams.

Throughout our history, faculty have continued to forge new roles for pharmacists and new models of care that not only improve the health of our communities, but also serve as practice laboratories to prepare the next generation of pharmacy providers.

Acknowledging the importance of appropriate medication management in patients with chronic conditions, the College of Pharmacy has expanded its presence in primary care and specialty clinics throughout the UNM Health System and across New Mexico, using innovative technologies and new clinical programs.

**College of Pharmacy clinical faculty currently support:**

- Medication Therapy Management  
- Patient-Centered Medical Homes  
- Project ECHO  
- Translational Radiopharmacy  

- Pharmacy Management  
- Consulting Services  
- Faculty Practice Specialties and Sites
We train students in the art of keeping people healthy. Population health is a system-based approach to disease prevention and wellness that emphasizes addressing the social determinants of health, analyzes the effectiveness of health care interventions and encourages collaboration. As UNM’s newest college – and only the second college of population health in the U.S. – we will be the first to offer a bachelor’s degree to help meet a growing need for a workforce that will enable health systems to transform themselves and help to improve wellness and disease prevention.

**Programs**

**Current**

**Bachelor of Science in Population Health**
Degree program will prepare graduates for careers in business, informatics, engineering, architecture, planning, law, medicine, community advocacy and political organizing.

**Master of Public Health**
There have been 239 graduates since the program began in 1994. Reaccredited by the Council on Education in Public Health in 2009, this 42-credit degree has three concentrations:
- Community Health
- Epidemiology
- Health Systems, Services and Policy

**Anticipated**

**Doctorate in Public Health Sciences**
Program under development. We plan to submit a proposal to the UNM Faculty Senate in FY 2017.

**Population Health Certificate for Health Professionals**
This certificate will offer an interprofessional approach to learning population health competencies.
The UNM School of Medicine educates doctors and other health professionals for New Mexico. The school, founded in 1964, is committed to excellence in education, research, patient care and community service. Its primary care, family medicine and rural medicine programs consistently appear high in national rankings of medical graduate education programs. School of Medicine faculty members are the core clinicians at UNM’s teaching hospitals and clinics.

Graduate Medical Education

Graduate medical education – or residency – is the period of training after medical school during which physicians become qualified for independent practice in their chosen specialty. Initial post-medical school residency training lasts between three and seven years, depending on the specialty. Some resident physicians will choose to further specialize by receiving fellowship training. These programs cover a full range of primary care and specialty fields and overall include 17 initial post-medical school residencies and 36 sub-specialty fellowship programs. The emphasis is on preparing physicians who understand New Mexicans’ unique health care needs to provide safe, high-quality and cost-effective medical care.

The School of Medicine’s education programs provide training for medical students, resident physicians and practicing physicians, as well as students in public health and allied health programs.

Programs and Divisions

Continuing Medical Education and Professional Development

We integrate education with the UNM Health System’s strategic priorities, sponsoring programs that use evidence-based educational methods to enhance clinical and professional performance. These include annual conferences and courses that provide clinicians with up-to-date information, grand rounds and other regularly scheduled series, physician mini-sabbaticals, statewide practice-based teaching initiatives, faculty development series and research that incorporates new methods for adult learning and education evaluation.

Our 125 board-certified oncology physicians work in multi-disciplinary teams along with nurses, pharmacists and other cancer professionals to develop specialized treatment plans for each patient. We offer more than 175 cancer clinical trials that provide access to the latest drugs and treatments. We treat about 60 percent of adults and virtually all the children in New Mexico diagnosed with cancer — more than 10,000 people — from every county in the state in more than 135,000 clinic visits each year. Our Total Cancer Care/ORIEN project will offer advanced genome sequencing to target the most promising treatments for each patient.

We provide superior clinical care to patients with skin disease. We specialize in medically and surgically challenging cases in an academic practice environment and provide educational opportunities and continuing medical education conferences, for trainees and community dermatology providers. We employ the state’s only pediatric dermatologist and are growing our faculty.

We provide top-quality outpatient care for our dermatologic cancer patients, in coordination with other UNM Health System specialty and primary care services and the UNM Comprehensive Cancer Center. We also provide laser and esthetic services.

Our current initiatives include teledermatology, with the goal of providing dermatological services to rural and underserved areas in New Mexico, as well as to meet the demands of UNM Hospital, UNM Sandoval Regional Medical Center and other health care organizations.

**Specialty Programs**

- Teledermatology
- Multidisciplinary Vascular Lesions Clinic
- Laser Clinics
- Surgery Clinic

**Clinical Expertise**

- Complex Medical Dermatology
- Pediatric/Adolescent Dermatology
- Skin Cancer Surveillance
- Dermatologic Surgery
- Psoriasis
- Acne
- Hemangiomas (and Other Birthmarks)
- Laser Procedures
- Phototherapy

Our physicians, physician assistants and psychologists provide complete clinical care, from pregnancy to geriatrics and palliative care, as well as every life stage in between. We also provide services that target special-needs and underserved patients within our community. These programs include Milagro, FOCUS, the Transdisciplinary Evaluation and Support Clinic and adolescent care for juveniles who are incarcerated.

### Programs
- Family-centered prenatal care, delivery and postnatal care
- Prenatal care, counseling and case management focusing on expectant women with substance abuse issues
- Family-centered care for the child born to a mother with substance abuse issues
- Integrated care for developmentally disabled adult patients

### Clinical Expertise
- Primary Care
- Pediatric and Adolescent Medicine
- Reproductive Health
- Pregnancy and Delivery
- Postpartum and Infant care
- Adult and Geriatric Medicine
- Behavioral and Psychological Care
- Adult Inpatient Services
- Pain Management
- Palliative Care
- Substance Abuse

The Department of Internal Medicine serves as a state-of-the-art regional resource, providing leadership, excellence and innovation in patient care, quality improvement, education and research. The staff and internationally recognized faculty in UNM’s largest and most diverse department are dedicated to providing care and educational opportunities for all New Mexicans.

Our specialists also serve patients and referring providers from western Texas, southern Colorado and eastern Arizona, both through direct referral care and via telemedicine. We serve UNM Hospitals, the Raymond G. Murphy Veterans Affairs Medical Center, the UNM Comprehensive Cancer Center and UNM Sandoval Regional Medical Center.

Residency training programs include Integrative Medicine and Primary Care tracks, as well as traditional hospital-based training.

We are the main tertiary referral center for New Mexico, west Texas, southern Colorado, eastern Arizona and the Navajo Nation. Our program has experienced tremendous growth in the past few years and continues to train top-notch young neurosurgeons. In 2014 the Centers for Medicare & Medicaid Services awarded us a $15.1 million grant to test the provision of emergent neurological care via telemedicine technology to 30 New Mexico hospitals.

### Clinical Expertise

**Obstetrics-Well Woman** – Provides maternity obstetric care and primary care services to women of all ages from throughout the Albuquerque metropolitan area.

**Nurse Midwifery** – We provide gentle, compassionate and individualized care throughout the lifespan, with an emphasis on pregnancy, birth and postpartum services.

**Perinatal Care** – High-risk pregnancy care and comprehensive ultrasound services provided by our specialists ensure the best possible outcomes for complicated pregnancies.

**Birth Control & Family Planning** – Contraceptive techniques are constantly changing. We offer the best alternatives to meet everyone’s personal needs.

**Gynecology Specialties** – Our areas of expertise include minimally invasive surgery (advanced laparoscopic and robotic surgery), pediatric/adolescent gynecology and cervical dysplasia.

**Urogynecology** – Our specialists help women who suffer from disorders of the pelvic floor and incontinence.

**Gynecologic Cancer** – We combine the latest in medical expertise with a patient-centered approach that focuses on the unique needs of each woman dealing with cancer.

Douglas P. Clark, MD
Chair and Professor
Our child-friendly fellowship-trained specialists provide comprehensive family-centered health care in 14 clinical specialties, including primary and acute care in our state-of-the-art Children’s Pavilion and outpatient facilities.

We work closely with the community through the UNM Center for Development and Disability, Prevention and Population Sciences, Envision Program, school-based health clinics and various outreach education and clinical programs, including our Newborn Transport Program.

Our clinical services are integrated into our research and education programs, enabling specialized, cutting edge treatment that community hospitals and practitioners can’t provide. We are training the next generation of New Mexico pediatric physicians. In these and many other ways we directly contribute to advancing the health and well-being of children and families throughout New Mexico.

The UNM Health System uses state-of-the-art teletechnology to connect patients and providers through New Mexico with our specialists.

**Center for Telehealth and Telemedicine**

The Center, housed within the UNM Medical Group, coordinates collaborative telehealth activities across the Health System, develops and incubates new telehealth programs and participates in research, evaluation and analysis of telehealth programs, and the impact on health outcomes.

Support services include clinical contracting, legal counsel, medical staff affairs and IT expertise. UNM offers “credentialing and privileging by proxy” in compliance with CMS and Joint Commission regulations, relieving community hospitals of the burden of primary source verification in credentialing.

[unm.edu/community/telehealth]
Project ECHO® (Extension for Community Healthcare Outcomes) improves access to specialty care for rural and underserved urban populations. This low-cost, high-impact intervention enables interdisciplinary specialist teams at UNM to share their expertise with primary care providers through teleECHO™ clinics, enabling them to develop the skills and knowledge to treat patients with complex conditions in their own communities. This is not “traditional” telemedicine, where the specialist assumes the care of the patient, but instead a guided practice model, in which the primary care provider retains responsibility for managing the patient.

Access to Cerebral Emergency Support Services (ACCESS)

Access to Cerebral Emergency Support Services (ACCESS) Teletechnology supported by a $15.1 million federal grant enables UNM specialists to provide round-the-clock consults on emergent neurological issues to physicians in 30 hospitals around New Mexico. In combination with UNM’s new endovascular stroke service, the service also makes state-of-the-art stroke care available to the state’s entire population.
