

Divided Attention

for trombone, fixed, and unfixed media

Stephen F. Lilly

(2012)

READ THIS FIRST

Stage set-up

- Omnidirectional microphone (within 6 inches of trombone bell when in standing center stage playing position)
- Single music stand (center stage)
- Chair with arm rests (back and stage right of music stand)
- Small table (stage right of stool or chair) with...
 - ...a computer (preferably a laptop) running MaxMSP
 - ...an empty glass (placed in front of the computer--in view of audience)
 - ...a pitcher half-filled with water (placed to the side of the glass, away from the chair)

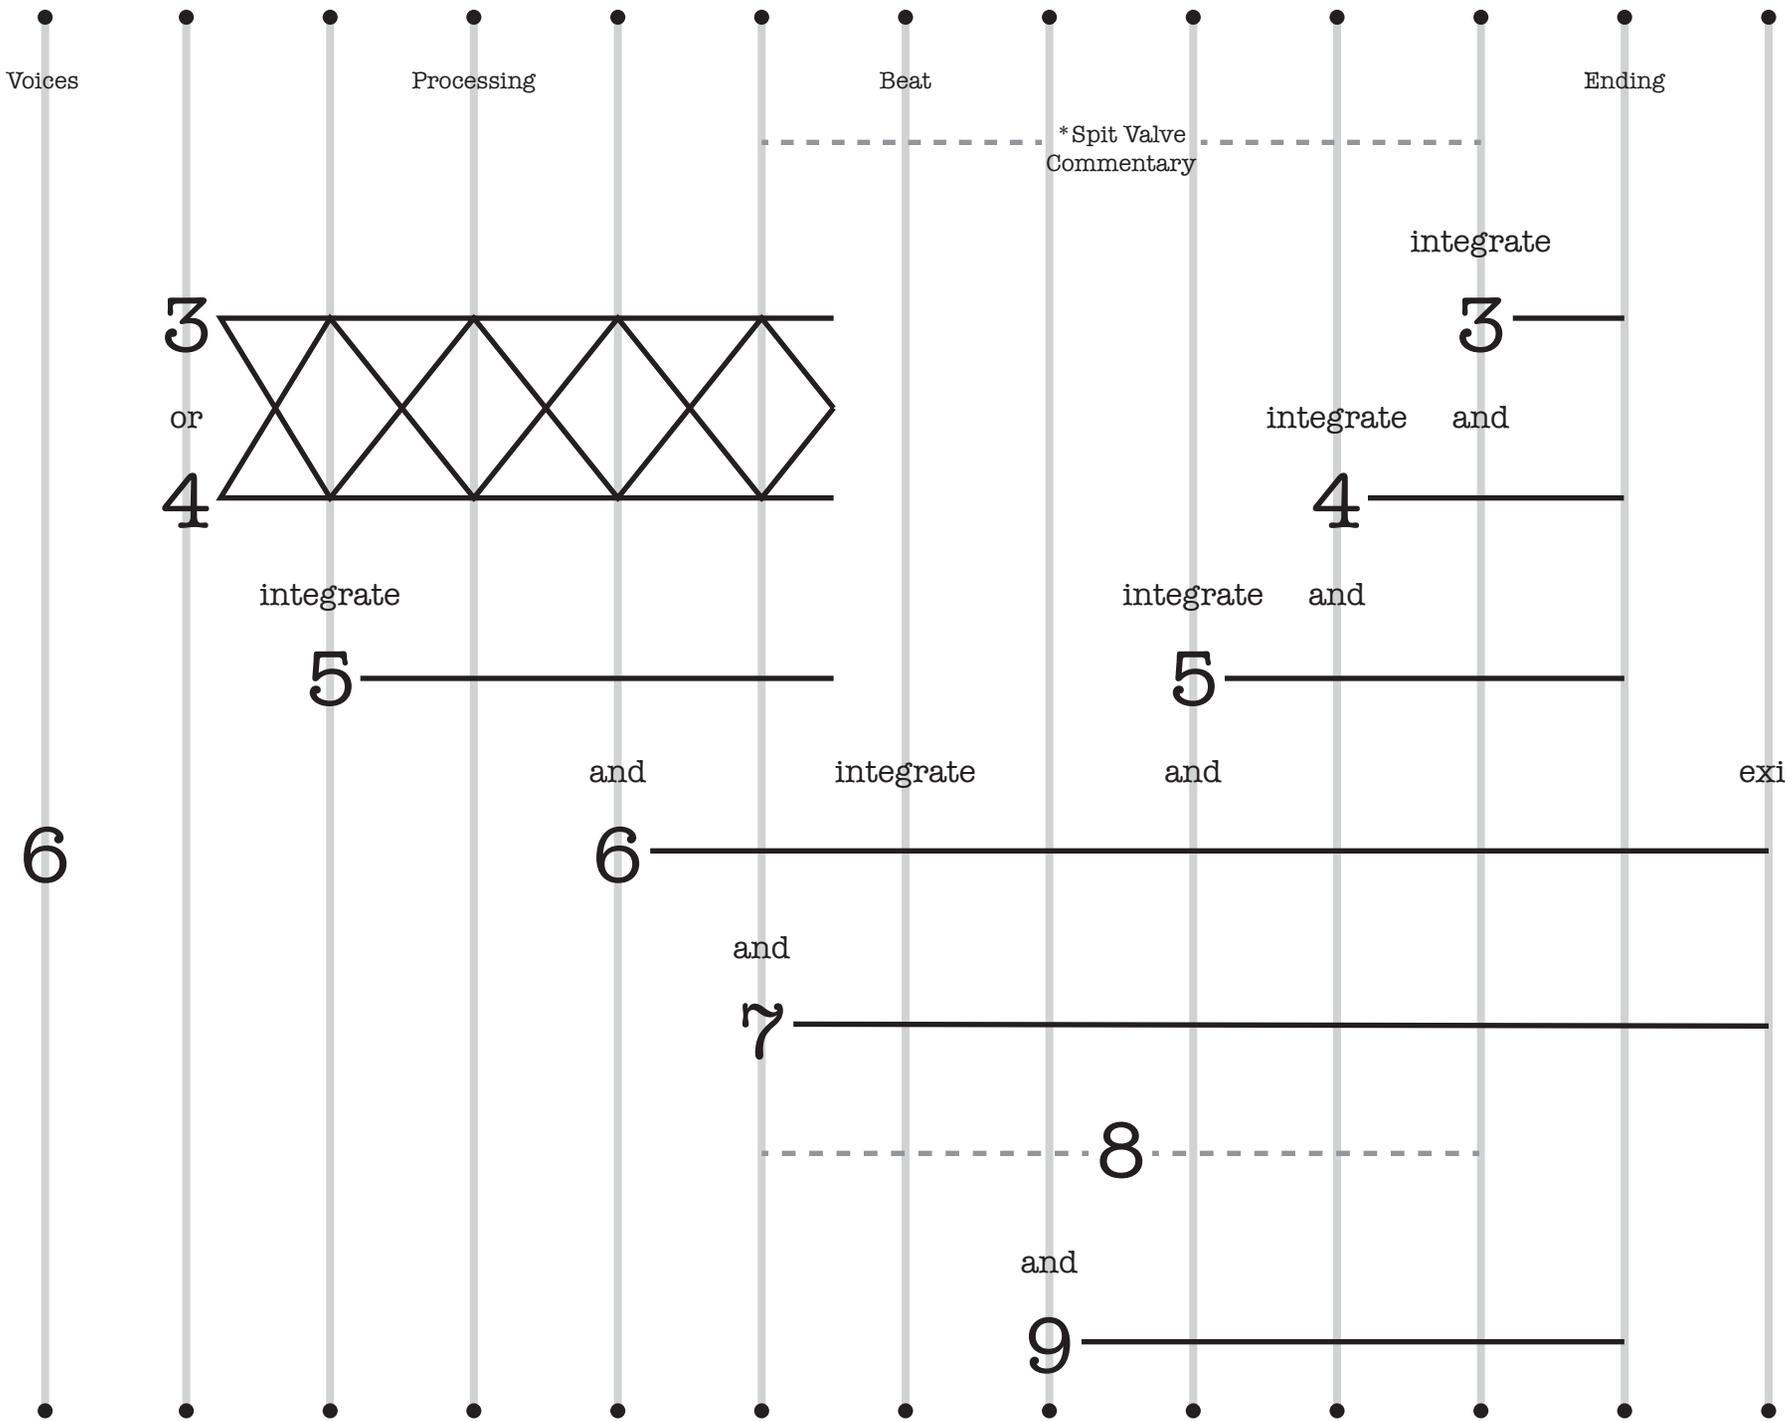

Entrance of trombonist

- Rag in back pocket (hidden from view of audience)
- Should walk with trombone to standing center stage position (behind music stand)

Score Interpretation

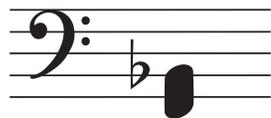

- Gray numbers are page indices and should not be interpreted
- Any vague text and graphics (e.g. page 7) are intentionally unclear for the performer to interpret as he/she sees fit
- Page 2 is the page sequencing to be followed by the performer
 - Vertical lines ONLY indicate sequencing and synchronization
 - Timing is to be improvised by the performer
 - The lines are evenly spaced for clarity; they SHOULD NOT be performed at regular intervals
- Electronics Triggers refers to “buttons” to be activated in MaxMSP
- DO NOT OVERACT (especially pages 7 and 8)
 - The intention of these pages is to control the distractions that naturally occur within a typical performance
- The timing on pages 3-9 should not be interpreted as a traditional score (represented horizontally).
 - This is especially true of page 9, which is a probability graph representing an outside-time structure.

Electronics Triggers:

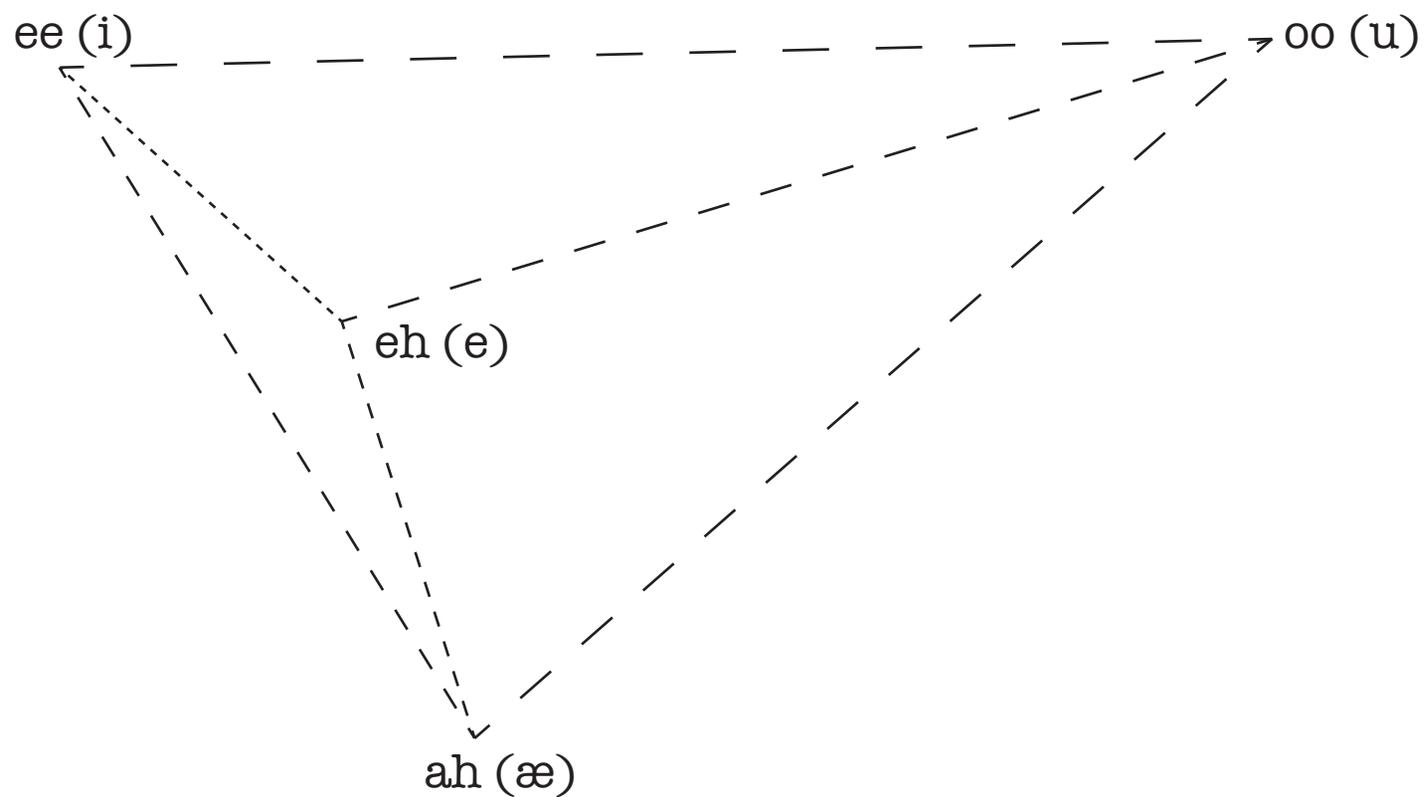

*Spit Valve Commentary triggered after specified instruction on page 7

1) Play a single note in the range:

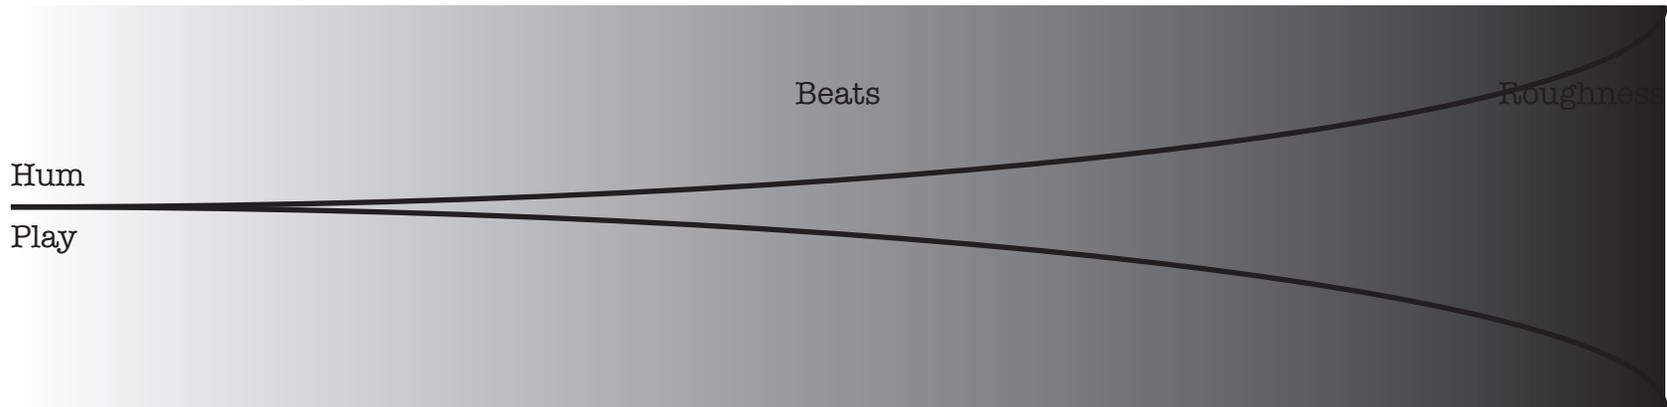

3

2) Transform vowel:

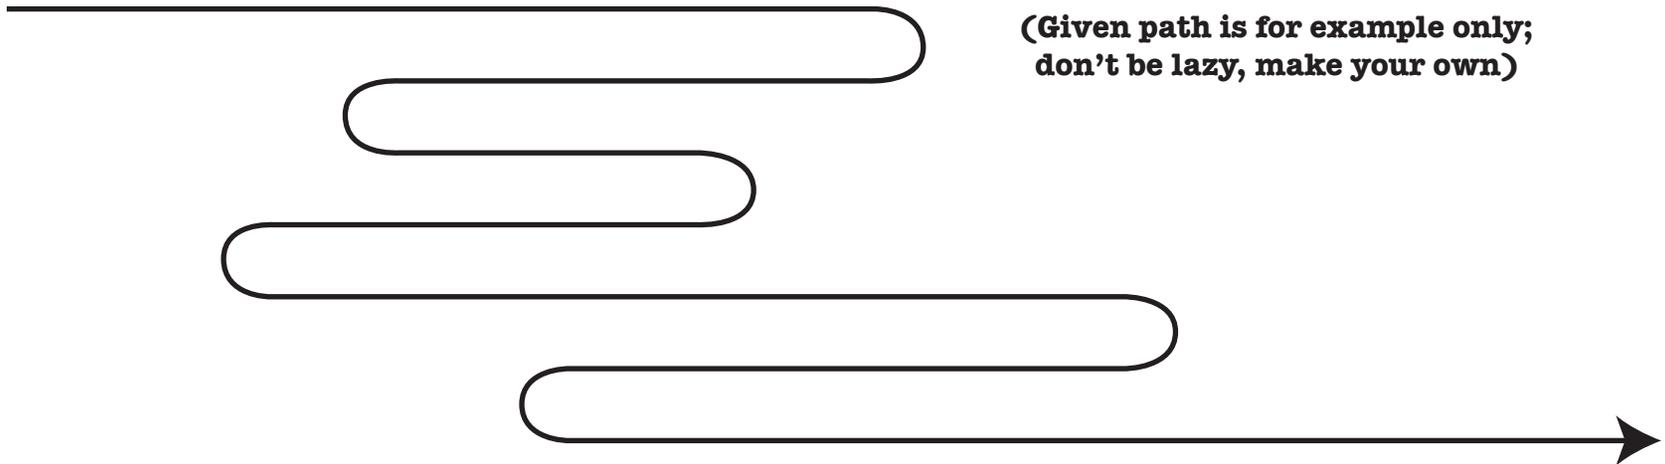

1) Play and hum any pitch.

Unison

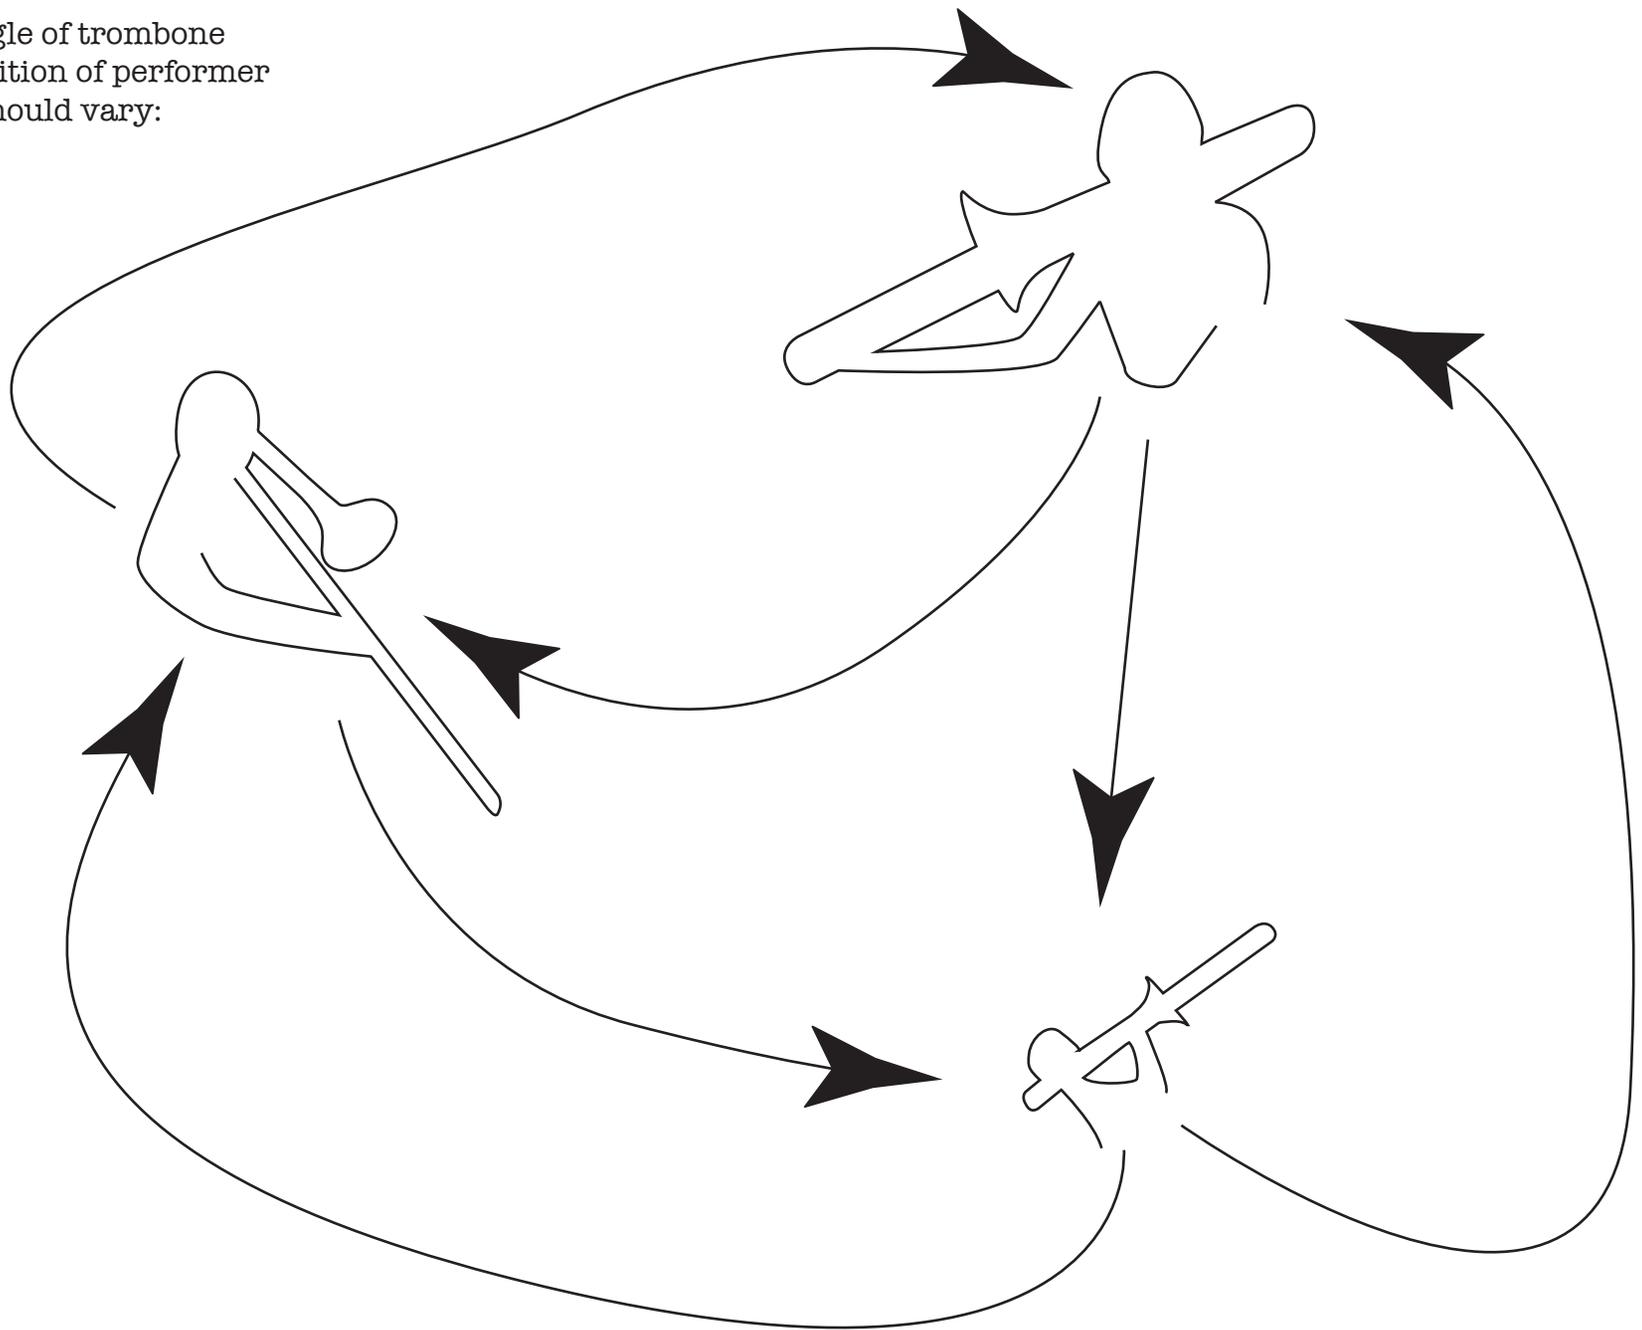

2) Referencing chart above improvise gliss:

4

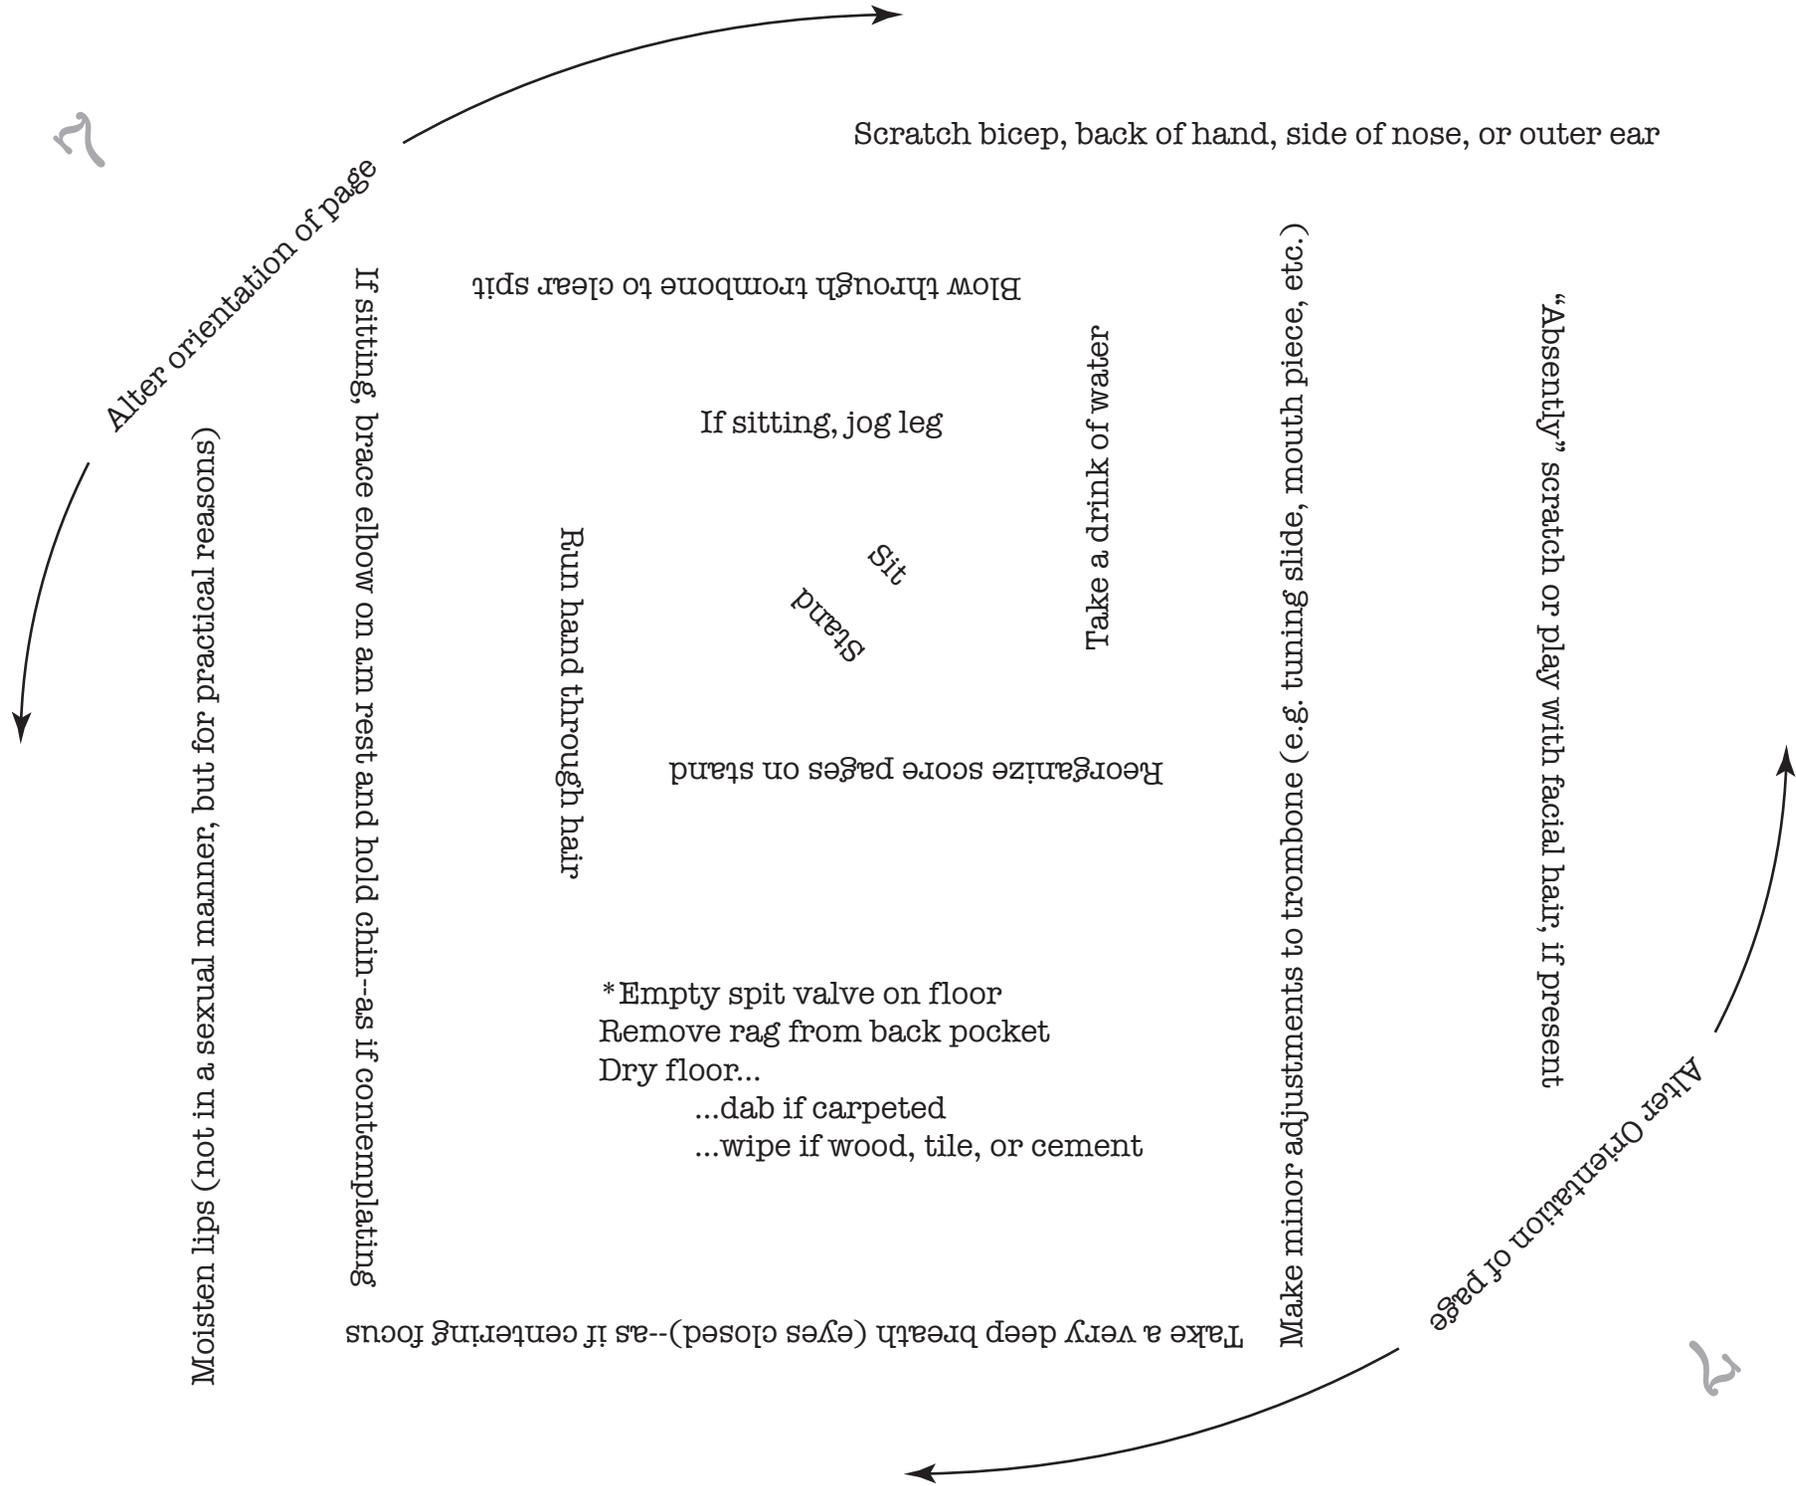

Suggested Alternative: Invert humming and playing (i.e. humming below playing)

Angle of trombone
Position of performer
...should vary:

6

Silence

Moisten lips (not in a sexual manner, but for practical reasons)

Alter orientation of page

Take a very deep breath (eyes closed)--as if centering focus

* Empty spit valve on floor
 Remove rag from back pocket
 Dry floor...
 ...dab if carpeted
 ...wipe if wood, tile, or cement

Run hand through hair

Reorganize score pages on stand

Stand
 Sit

If sitting, jog leg

Take a drink of water

Blow through trombone to clear spit

Scratch bicep, back of hand, side of nose, or outer ear

Make minor adjustments to trombone (e.g. tuning slide, mouth piece, etc.)

Alter Orientation of page

"Absently" scratch or play with facial hair, if present

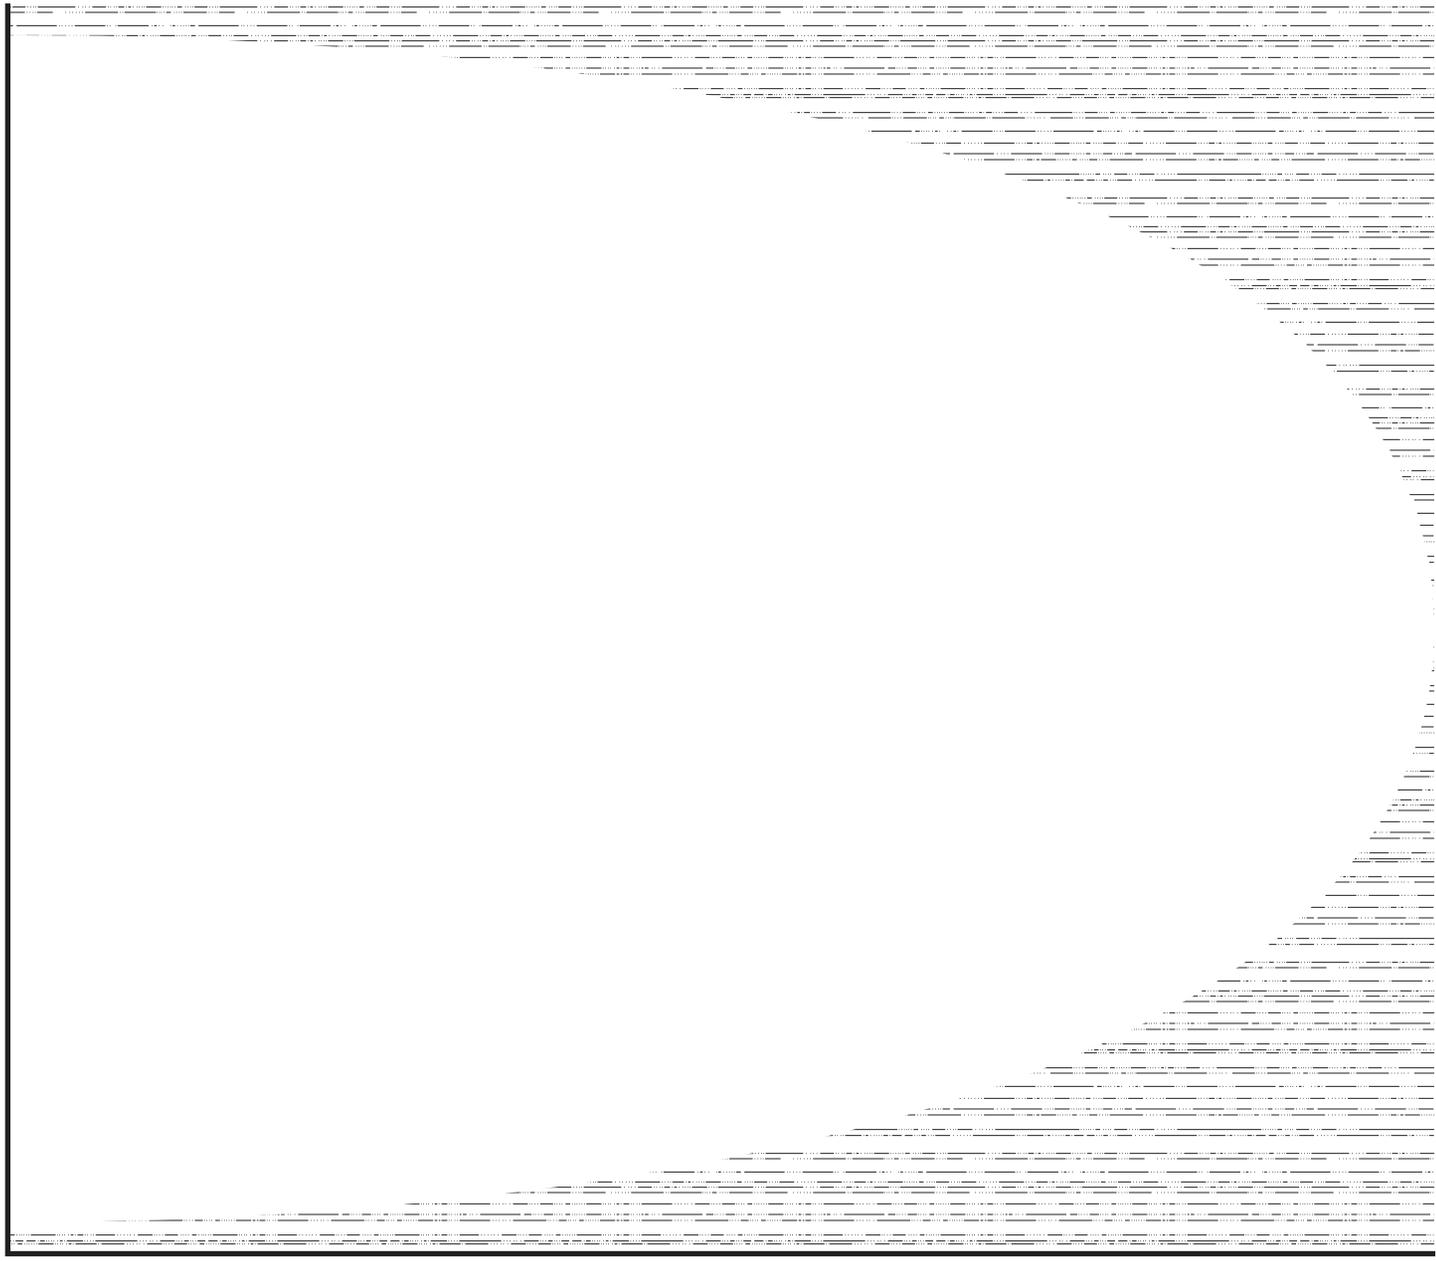

Discard this page

Niente-----DYNAMIC LEVEL-----Fortissimo

Attack Only-----DURATION-----Full Breath

Pedal Tone-----PITCH-----Squeaks

High-----PROBABILITY-----Low
