To Whom It May Concern

It was a real pleasure collaborating with Enrica on *Skinship*, the whole end to end process was seamless and highly enjoyable. She went above and beyond to deliver a breathtaking soundtrack which really elevated the overall narrative of the film.

She was always at hand to answer any questions, made any necessary adjustments quickly and made me feel at ease throughout the whole process. She was able to score from concept to completion quickly, efficiently, and with high quality... the end result was just beautiful!
